

The background of the image is a close-up photograph of a stack of stainless steel pipes. The pipes are arranged in a way that creates a strong sense of depth, with the foreground pipes being in sharp focus and the background pipes fading into a soft blur. A diagonal design element, consisting of several overlapping semi-transparent geometric shapes in shades of blue and white, runs from the top right towards the bottom left, partially obscuring the pipes. The overall aesthetic is clean, industrial, and modern.

Schedule 40 & 80

BUILT TO STAND THE TEST OF TIME

COMMERCIAL & INDUSTRIAL PIPES

AQUALOC®

Next Polymers' SCHEDULE Series pipes are cost-effective and long-lasting solutions. They resist electrolytic corrosion as well as acidic and alkaline soils. Thanks to their lightweight design, they are easy to handle and install, requiring less time and effort. They connect directly to most plumbing and IPS fixtures without the need for complicated procedures or adapters, and they are compatible with CIOD fittings using adapters and/or transition gaskets.

APPLICATIONS

- Potable water systems
- Irrigation piping
- Wastewater disposal
- Venting
- Mechanical piping, pumps
- Industrial processing
- Pool systems
